The following alphabetical designators are used to delineate functional areas within military installations.

- A. Billeting area
- B. Vehicle storage/maintenance
- C. General storage area
- D. Ammunition storage
- E. Miscellaneous (hospitals, prisons, POL, personnel training facilities and unidentified facilities)
- F. Small arms range
- G. Driver training area
- H. Support
- J. Tank/assault gun range
- K. Flat trajectory range
- L. Sub caliber range
- M. APC range
- N. Combined arms range
- P. Artillery training area
- Q. Infantry training area
- R. Special or unidentified area

- NOTE: 1. The absence of one or more alphabetical designators indicates that those functional areas were not observed at that particular installation.
2. Lower case letters (i.e., Ba) are used to delineate more than one area of a particular functional category.
3. Numbers are used with the alphabetical designators in some instances to identify vehicles or groups of vehicles within a functional area (i.e., Ba 1).

H. Support Area (Figure 2)

A partially secured area containing 3 probable storage/support buildings.

K. Possible Flat Trajectory Range (Figure 1)

This area contains a possible flat trajectory sub caliber/small arms firing range with an approximate length of 700 ft. (200 plus meters). Four support buildings are located at this facility.

R. Unidentified Area (Figure 2)

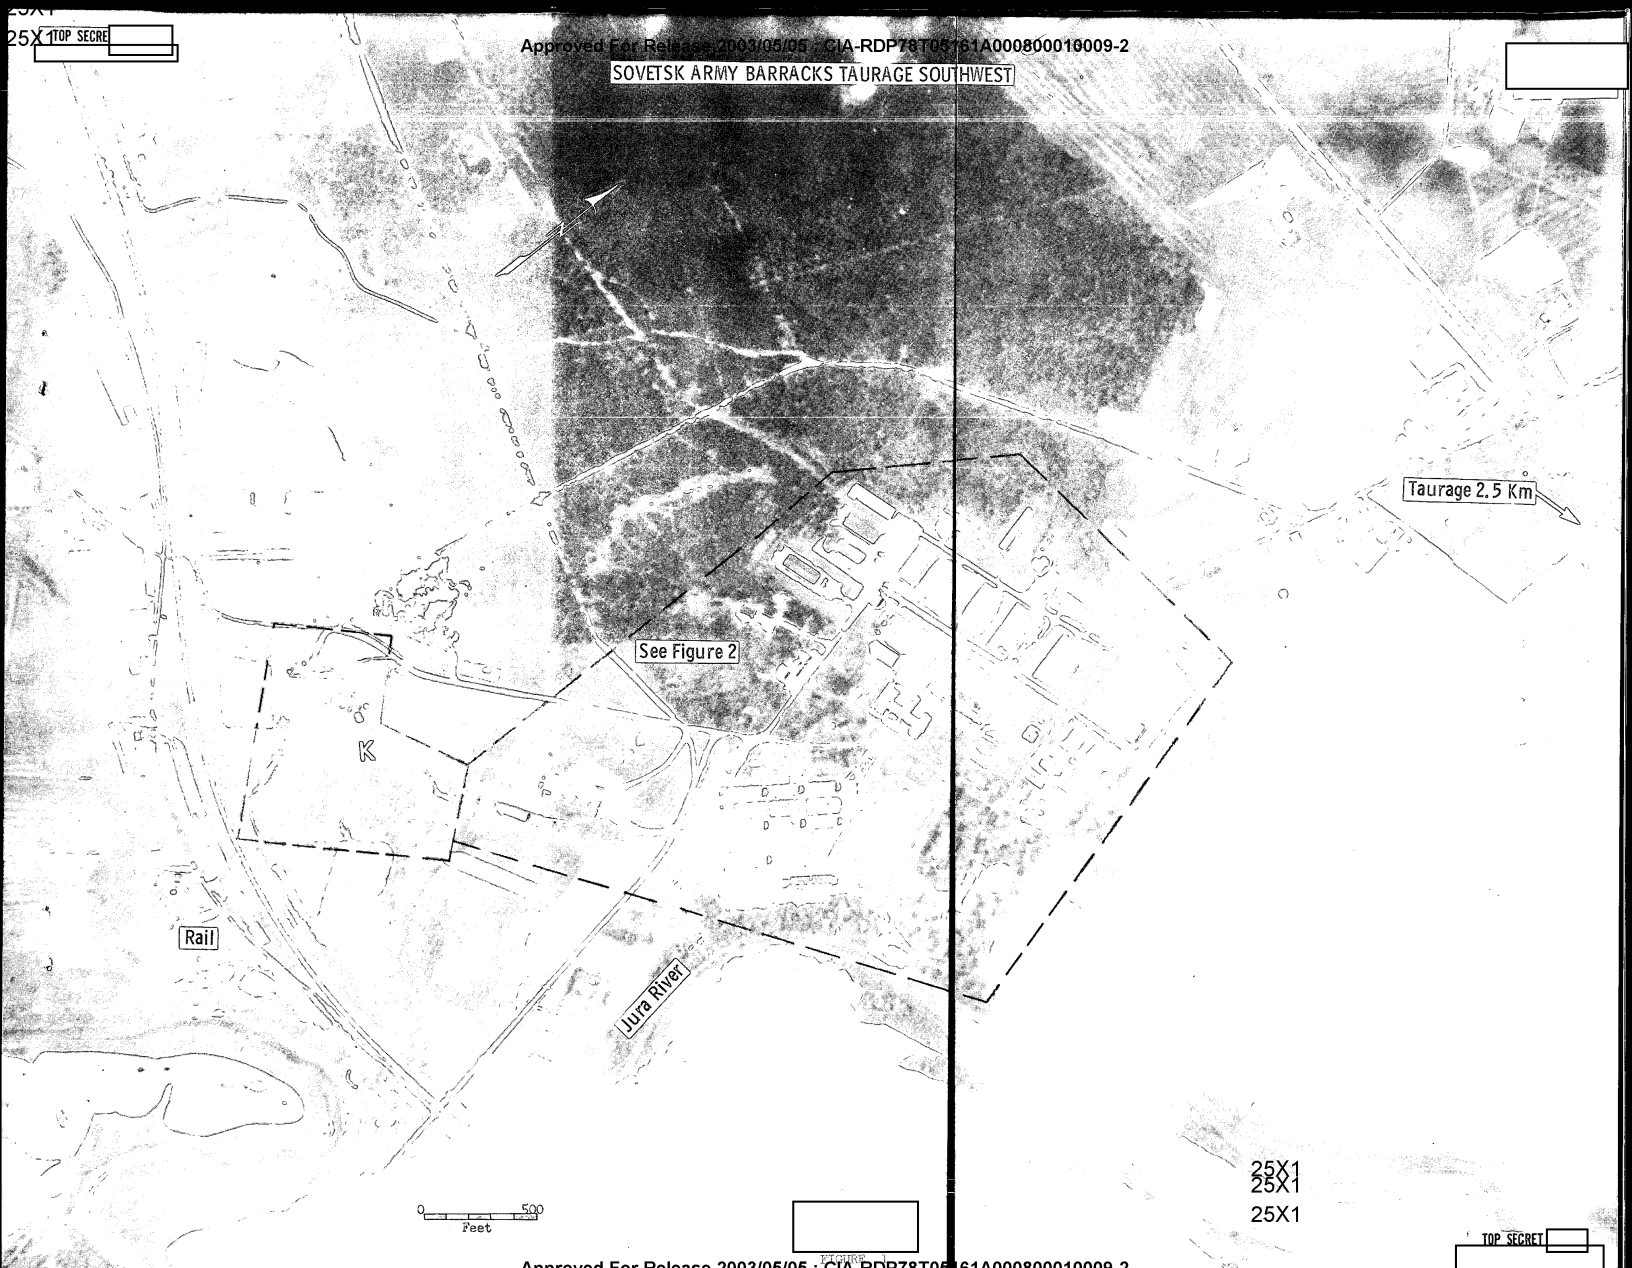

Area contains one small building of unidentified function and a possible open storage area with unidentified material.

P.I. REMARKS

Comparative photographic analysis indicates that no significant changes have occurred at this installation since [REDACTED] Approximately 5 small buildings were added during the comparative time period. The lack of adequate training facilities to support a line ground force unit i.e., extensive firing ranges, driver training courses, etc., plus the presence of static display aircraft, suggest that this facility may be utilized as a personnel technical training center. Possibly a large portion of the floor space in the "barracks type" buildings is utilized for classrooms.
